Daniel Cohen

Mathematics & Statistics Professional | Data Analyst | Quantitative Educator
GitHub: github.com/Coakley11

PROFESSIONAL SUMMARY

Quantitative professional with graduate training in statistics and finance, extensive mathematics teaching experience, and a portfolio of production analytics applications. Translates statistical theory, SQL reporting, and experimental design into interactive decision-support products for finance, sports, and AI evaluation workflows.

EDUCATION

M.S. Statistics - Hunter College

Graduate training in statistical inference, modeling, and data analysis

MBA Finan

Finance, investment analysis, and quantitative decision frameworks

B.A. Appli

Applied mathematics, economics, and quantitative reasoning

EXPERIENCE

Analytics & AI Portfolio Developer (2024 - Present)

Independent - Daniel AI Suite

- Built and deployed seven production Streamlit applications spanning portfolio analytics, sports modeling, AI evaluation, and decision-support simulations
- Authored SQL & Excel analytics workbooks with KPI dashboards, pivot exercises, and structured query practice for recruiter-facing evidence
- Designed portfolio demo modes, case-study narratives, and QA workflows for recruiter-ready product demonstration

College Mathematics & Statistics Instructor

Higher Education

- Taught undergraduate mathematics and statistics with emphasis on applied problem solving and statistical literacy
- Developed instructional materials connecting theory to real-world quantitative decisions
- Supported student mastery of hypothesis testing, regression concepts, and data interpretation

High School Mathematics Teacher

Secondary Education

- Delivered algebra, geometry, and quantitative reasoning curriculum to diverse student populations
- Built foundational skills in logical reasoning, data literacy, and mathematical communication

Academic Tutoring - Mathematics & Statistics

Tutoring Center

- Provided individualized instruction in mathematics and statistics from remedial through advanced undergraduate levels
- Strengthened quantitative education through diagnostic assessment and targeted skill development

SELECTED PROJECTS

Investment Portfolio Analyzer | Python | Streamlit | yfinance

- Built live portfolio dashboard with Sharpe/Sortino metrics, Monte Carlo simulation, efficient frontier optimization, and correlation heatmaps
- Separated analytics core from UI for maintainability; deployed on Streamlit Cloud

Baseball Analytics Explorer | Python | Streamlit | scikit-learn

- Developed MLB analytics platform with statistical significance testing, ML projections, and fantasy draft decision support
- Implemented pytest coverage for projection calibration and draft strategy logic

Applied Mathematical Intelligence | Python | Streamlit

- Designed modular Mathematical Thinking Lab with betting EV, AI training visualization, and epidemic simulation engines
- Built pedagogical UX pattern: explain -> simulate -> interpret -> math depth

SQL & Excel Analytics Workbooks | Excel | SQL | pandas

- Created AI evaluator, investment, quant, and credit-risk workbooks with KPI dashboards and SQL practice queries
- Demonstrates fluency across Python dashboards and spreadsheet-based business reporting

TECHNICAL SKILLS

Python | SQL | Statistics | Excel | Pandas | Streamlit | Data Visualization | Git / GitHub | AI-Assisted Development | Machine Learning | Monte Carlo Simulation | Portfolio Optimization

TARGET ROLES

Data Analyst | AI Evaluator | Business Intelligence Analyst | Research Analyst | Junior Data Scientist | Quantitative Analyst
