PROFESSIONAL SUMMARY

Mathematics and Statistics professional (M.A. Statistics & Applied Mathematics, GPA 3.93; MBA Finance & Investments, Finance GPA 4.00; SOA Exams P, FM, MFE) who owns product direction for a seven-app AI suite through independent portfolio ownership. Defines what products should do, translates goals into requirements and workflows, reasons through technical dependencies and system behavior, directs AI-assisted implementation, validates releases, diagnoses failures, and decides what happens next. Seeking fully remote U.S. roles as Technical Product Manager / AI Technical Product, AI Product Manager, and adjacent Technical Product Owner / Product Strategy positions. Quantitative analytics, SQL/Python, and AI evaluation strengthen that product work - they are not a separate career identity.

EDUCATION

M.A. Statistics & Applied Mathematics - Hunter College

GPA: 3.93

Overall GPA: 3.88 | Finance GPA: 4.00

Magna Cum Laude | Arthur D. Gayer Memorial Award in Economics

MBA Finance

B.A. Mathematics

CREDENTIALS AND CERTIFICATIONS

- Society of Actuaries - Exam P/1 (Probability), FM/2 (Financial Mathematics), MFE (Models for Financial Economics)
- NYS Certification - CST Mathematics (004), Educating All Students (EAS)

EXPERIENCE

Independent Product Owner - Daniel AI Suite (2024 - Present)

Independent - Daniel AI Suite

- Owned product direction across seven interconnected Streamlit applications - problem framing, feature prioritization, requirements, acceptance criteria, workflow design, and release readiness
- Designed multi-page product systems with persistence, multi-user state, APIs, recommendation engines, and cross-app resume/insight orchestration (Supabase-backed patterns)
- Directed AI-assisted implementation while personally validating expected vs. actual behavior, diagnosing defects, prioritizing fixes, and regression-checking before release

Full-Time High School Mathematics Teacher (2024 - Present)

The Montfort Academy

- Instruct Algebra II, Geometry, and Pre-Calculus with emphasis on quantitative reasoning, functions, and data interpretation
- Support Chemistry and Physics laboratory sessions requiring measurement, precision, and analytical documentation
- Apply structured problem-solving frameworks that parallel analytics debugging and hypothesis-driven analysis

Permanent Full-Time Substitute Teacher (2021 - 2024)

Yeshiva Har Torah

- Delivered K-8 secular and Judaic studies instruction across multiple subjects and grade levels
- Prepared science laboratory materials and supported hands-on quantitative observation activities
- Maintained classroom data tracking for student progress and instructional adjustment

Mathematics Instructor (2020)

Pace University

- Taught Mathematics for Life, College Algebra, and Calculus I - connecting algebraic reasoning to applied decision contexts
- Emphasized interpretation of quantitative results, not just procedural computation

Mathematics Instructor (2020)

Yeshiva University

- Led Calculus III Problem Solving Seminar focused on multi-step analytical reasoning and proof-style logic

Full-Time Lecturer / Adjunct Lecturer (2014 - 2019)

Kingsborough Community College (CUNY)

- Taught Quantitative Reasoning, College Algebra, Intermediate Algebra, Principles of Mathematics, and Pre-Algebra
- Developed curriculum reinforcing probability intuition, algebraic modeling, and statistical literacy at scale
- Supported diverse learners in translating word problems into structured quantitative frameworks

Adjunct Lecturer (2015 - 2019)

Queens College (CUNY)

- Instructed Probability & Statistics, Pre-Calculus, Calculus, College Algebra, and Math for Elementary School Teachers
- Taught hypothesis-testing concepts, probability distributions, and regression intuition at undergraduate level

Business Statistics Lab Professor (2012)

Queens College

- Led Business Statistics labs with Excel instruction, computer-lab analytics exercises, and data interpretation assignments
- Connected descriptive statistics, inference, and spreadsheet modeling to business decision scenarios

College Assistant & Academic Tutor (2011 - 2014)

Queens College

- Tutored Statistics, Economics, and Finance with focus on quantitative support and exam preparation
- Diagnosed knowledge gaps and built targeted practice for data interpretation and financial quantitative reasoning

Mathematics & Statistics Tutor (2011 - Present (periodic))

Tutor Doctor | Club Z | Private | SAT Prep

- Provided individualized instruction in Mathematics, Economics, Statistics, and Finance from remedial through advanced undergraduate levels
- Delivered SAT mathematics preparation emphasizing problem decomposition and analytical speed

SELECTED PROJECTS

AI Music Practice Coach | Python | Streamlit | OpenAI | Supabase

- Owned product direction for a multi-page practice studio: practice, creative, backing tracks, logging, AI coaching, persistence, and cross-page context
- Defined state ownership, acceptance criteria, and release readiness while directing AI-assisted implementation and regression checks

Baseball Analytics | Python | Streamlit | scikit-learn | Supabase

- Designed shared leagues, live draft rooms, imports, lineup/trade workflows, and Decision Score recommendations as a multi-user product system
- Sequenced features for draft -> season ops continuity; validated persistence, permissions, and collaborative behavior

AI Command Center + AMI | Python | Streamlit | Supabase

- Architected suite orchestration: resumable workflows, context handoffs, activity continuity, and modular AI decision labs
- Routed users to the right tool and returned explainable analytical insights across sibling applications

Investment Explorer | Python | Streamlit | yfinance

- Turned Monte Carlo, efficient frontier, and health scoring into adjustable, explainable decision workflows for beginners and advanced users
- Separated analytics core from UX so complex quant methods become product choices, not chart galleries

TECHNICAL SKILLS

Product Strategy | Requirements | Acceptance Criteria | Workflow Architecture | Feature Prioritization | Release Readiness
 | AI Feature Design | AI Evaluation | Python | Streamlit | SQL | Excel | Supabase | APIs | Git / GitHub | Statistics | Product Metrics | Regression Testing | AI-Assisted Development

TARGET ROLES

Fully remote U.S. | Grouped by related role families

Primary

Technical Product Manager | AI Technical Product

Secondary

AI Product Manager

Adjacent

Technical Product Owner | Product Strategy
