

DANIEL COHEN

AI PRODUCT MANAGEMENT | PRODUCT STRATEGY | USER WORKFLOWS & AI-NATIVE PRODUCTS

Queens, New York | daniel.cohen11@yahoo.com | [linkedin.com/in/daniel-cohen-355319340](https://www.linkedin.com/in/daniel-cohen-355319340) | github.com/Coakley11
Portfolio: coakley11.github.io/master-portfolio-hub/ | Open to fully remote U.S. roles

PROFESSIONAL SUMMARY

AI product-focused quantitative professional with graduate training in statistics and finance and hands-on ownership of a seven-application AI/analytics suite. Career experience in education built deep skill in diagnosing user needs, translating complexity, and adapting to feedback; recent product work applies those strengths to deciding what to build, designing end-to-end workflows, prioritizing features, defining success criteria, evaluating releases, and iterating AI-enabled products from concept through deployed behavior. Targeting AI Product Manager and product roles where broad ownership, user value, technical fluency, and rapid experimentation matter more than narrow repetitive analysis.

CORE SKILLS

Product Management: Problem framing, product strategy, user journeys, feature prioritization, roadmaps/backlogs, requirements, acceptance criteria, release decisions, iterative improvement

AI Product: AI feature design, prompt iteration, human-in-the-loop workflows, model evaluation criteria, quality/risk tradeoffs, recommendation systems, AI-assisted prototyping and development

Product Analytics: Product metrics, KPI analysis, SQL, Excel, Python, Pandas, hypothesis testing, experimentation concepts, simulation, data visualization, decision support

Technical Fluency: Streamlit, APIs, Git/GitHub, Supabase, persistence/state, authentication concepts, debugging, testing, deployment, cross-feature dependency reasoning

AI PRODUCT PORTFOLIO EXPERIENCE

Independent AI Product Builder | Daniel AI Suite | 2024-Present

- Own product direction across seven applications, choosing problems to solve, defining target user workflows, sequencing features, and deciding when a release is useful and reliable enough to move forward.
- Turn broad user goals into concrete product requirements, page flows, feature behavior, data/persistence rules, success criteria, and prioritized implementation plans.
- Direct AI-assisted implementation with Cursor/ChatGPT, test live behavior, identify product failures, revise requirements, and iterate based on observed user and system outcomes.
- Design connected product experiences so users can move between analysis, practice, recommendations, saved work, and AI coaching without losing context.
- Combine domain expertise in music, sports, investing, statistics, and education with quantitative evidence to make product choices and explain complex outputs to end users.

SELECTED PRODUCTS

- AI Music Practice Coach - Designed the end-to-end musician journey across practice, Creative/Missions, backing, recording/upload analysis, logging, AI coaching, and persistent context; repeatedly prioritized user coherence over isolated feature completion.
- Baseball Analytics Platform - Owned product workflows across research, recommendations, live drafting, shared leagues, imports, persistence, chat/trade/lineup concepts, and multi-user behavior.
- Daniel AI Command Center + AMI - Designed suite-level navigation, resumable workflows, analytical handoffs, and modular AI coaching so specialized tools function as one coherent product ecosystem.
- Investment Explorer - Designed beginner/advanced investment workflows that convert portfolio analytics, Monte Carlo simulation, efficient-frontier analysis, risk diagnostics, and ETF overlap into explainable recommendations.

PROFESSIONAL EXPERIENCE

Full-Time High School Mathematics Teacher

2024-2026

The Montfort Academy | Mount Vernon, NY

- Taught Algebra II, Geometry, Pre-Calculus, SAT preparation, and quantitative problem solving; also supported chemistry and physics laboratory instruction.
- Translated complex quantitative ideas into structured explanations, diagnostic feedback, and measurable learning objectives for varied audiences.

Permanent Full-Time Substitute Teacher

2021-2024

Yeshiva Har Torah | Queens, NY

- Adapted across K-8 subjects and changing daily requirements, coordinated classroom workflows, and made rapid decisions in unfamiliar situations.

College Mathematics & Statistics Instructor

2012-2020

Pace University; Yeshiva University; Kingsborough Community College; Queens College | New York, NY

- Taught Probability & Statistics, Business Statistics, Calculus I-III, College Algebra, Pre-Calculus, Quantitative Reasoning, and mathematics for elementary educators.
- Used Excel and computer-lab instruction to connect formulas, data, statistical concepts, and financial applications to practical decisions.

College Assistant, Academic Tutor & Private Tutor

2011-2024

Queens College and independent tutoring organizations | New York, NY

- Diagnosed reasoning gaps and designed targeted support in statistics, economics, finance, mathematics, and SAT preparation.

EDUCATION & CREDENTIALS

- Hunter College - M.A., Statistics & Applied Mathematics | GPA: 3.93
- Baruch College, Zicklin School of Business - MBA, Finance & Investments | Overall GPA: 3.88; Finance GPA: 4.00
- Queens College, CUNY Honors College - B.A., Mathematics & Economics | Magna Cum Laude; Arthur D. Gayer Memorial Award in Economics
- Credentials: Society of Actuaries Exams P/1 (Probability), FM/2 (Financial Mathematics), and MFE (Models for Financial Economics); NYS CST Mathematics and Educating All Students exams.
