

DANIEL COHEN

TECHNICAL PRODUCT MANAGEMENT | AI PRODUCT | SYSTEMS & RELEASE OWNERSHIP

Queens, New York | daniel.cohen11@yahoo.com | [linkedin.com/in/daniel-cohen-355319340](https://www.linkedin.com/in/daniel-cohen-355319340) | github.com/Coakley11
Portfolio: coakley11.github.io/master-portfolio-hub/ | Open to fully remote U.S. roles

PROFESSIONAL SUMMARY

Technical-product focused professional with graduate training in statistics and finance and hands-on ownership of a seven-application AI/analytics suite. After years of translating complex quantitative ideas for students, shifted that same structured reasoning toward designing products and systems: framing problems, defining technical behavior, prioritizing features, specifying workflows and state/persistence rules, validating releases, and resolving mismatches between intended and actual behavior. Best fit is broad technical-product work where product judgment, systems thinking, quantitative reasoning, and engineering-facing requirements come together.

CORE SKILLS

Technical Product: Product requirements, technical specifications, workflow architecture, data/state flows, persistence, APIs, authentication concepts, dependencies, edge cases

Product Delivery: Roadmap and backlog prioritization, acceptance criteria, QA/UAT thinking, defect triage, regression testing, release readiness, staged rollout/rollback reasoning

AI Product: AI feature design, prompt/system behavior, human-in-the-loop workflows, evaluation criteria, model-output validation, risk/failure-mode reasoning, AI-assisted development

Tools & Analytics: Python, SQL, Excel, Pandas, Streamlit, Supabase, Git/GitHub, APIs, product metrics, hypothesis testing, simulation, data visualization

TECHNICAL PRODUCT & AI PORTFOLIO EXPERIENCE

Independent Technical Product Builder | Daniel AI Suite | 2024-Present

- Own product direction across seven interconnected applications, deciding what to build, what to defer, how workflows should connect, and what evidence is required before a release is accepted.
- Translate open-ended goals into engineering-ready behavioral requirements covering page flows, canonical vs. temporary state, persistence, cross-page context, failure handling, acceptance criteria, and regression boundaries.
- Direct AI-assisted implementation with Cursor/ChatGPT, inspect behavior, diagnose product/system failures, refine requirements, and iterate until the implementation matches intended user outcomes.
- Design shared architecture concepts including account-owned workspaces, saved context, cross-application routing, multi-user workflows, recommendation logic, and AI coaching/evaluation patterns.
- Use quantitative analysis as decision support inside products rather than as an isolated end task, connecting metrics and models to user-facing actions and product decisions.

SELECTED PRODUCT SYSTEMS

- AI Music Practice Coach - Own system behavior across song selection, practice, creative tools, missions, backing tracks, recording/upload analysis, persistence, AI coaching, and cross-page handoffs; prioritize state ownership, workflow coherence, reliability, and acceptance testing.
- Baseball Analytics Platform - Designed an integrated multi-user season workflow spanning player research, recommendations, live draft rooms, shared leagues, imports, persistence, timers, permissions, and collaborative behavior.
- Daniel AI Command Center + AMI - Created suite-level orchestration for resumable work, task routing, context handoffs, saved state, and continuity across specialized products.
- Investment Explorer - Designed adjustable decision workflows that turn portfolio analytics, risk diagnostics, simulation, optimization, and overlap analysis into explainable user choices.

PROFESSIONAL EXPERIENCE

Full-Time High School Mathematics Teacher

2024-2026

The Montfort Academy | Mount Vernon, NY

- Taught Algebra II, Geometry, Pre-Calculus, SAT preparation, and quantitative problem solving; also supported chemistry and physics laboratory instruction.
- Translated complex quantitative ideas into structured explanations, diagnostic feedback, and measurable learning objectives for varied audiences.

Permanent Full-Time Substitute Teacher

2021-2024

Yeshiva Har Torah | Queens, NY

- Adapted across K-8 subjects and changing daily requirements, coordinated classroom workflows, and made rapid decisions in unfamiliar situations.

College Mathematics & Statistics Instructor

2012-2020

Pace University; Yeshiva University; Kingsborough Community College; Queens College | New York, NY

- Taught Probability & Statistics, Business Statistics, Calculus I-III, College Algebra, Pre-Calculus, Quantitative Reasoning, and mathematics for elementary educators.
- Used Excel and computer-lab instruction to connect formulas, data, statistical concepts, and financial applications to practical decisions.

College Assistant, Academic Tutor & Private Tutor

2011-2024

Queens College and independent tutoring organizations | New York, NY

- Diagnosed reasoning gaps and designed targeted support in statistics, economics, finance, mathematics, and SAT preparation.

EDUCATION & CREDENTIALS

- Hunter College - M.A., Statistics & Applied Mathematics | GPA: 3.93
- Baruch College, Zicklin School of Business - MBA, Finance & Investments | Overall GPA: 3.88; Finance GPA: 4.00
- Queens College, CUNY Honors College - B.A., Mathematics & Economics | Magna Cum Laude; Arthur D. Gayer Memorial Award in Economics
- Credentials: Society of Actuaries Exams P/1 (Probability), FM/2 (Financial Mathematics), and MFE (Models for Financial Economics); NYS CST Mathematics and Educating All Students exams.
