PROFESSIONAL SUMMARY

Mathematics and Statistics professional (M.A. Statistics & Applied Mathematics, GPA 3.93; MBA Finance & Investments, Finance GPA 4.00; SOA Exams P, FM, MFE) who builds quantitative and AI-assisted products through independent portfolio ownership. Seven deployed Streamlit applications plus SQL/Excel workbooks demonstrate requirements, workflow design, recommendation systems, AI output evaluation, validation, debugging, and deployment. Seeking fully remote U.S. roles in analytics, AI evaluation, product analytics, and associate-level AI/technical product and product engineering supported by portfolio-built applications.

EDUCATION

M.A. Statistics & Applied Mathematics - Hunter College

GPA: 3.93

Overall GPA: 3.88 | Finance GPA: 4.00

Magna Cum Laude | Arthur D. Gayer Memorial Award in Economics

MBA Finance

B.A. Mathematics

CREDENTIALS AND CERTIFICATIONS

- Society of Actuaries - Exam P/1 (Probability), FM/2 (Financial Mathematics), MFE (Models for Financial Economics)
- NYS Certification - CST Mathematics (004), Educating All Students (EAS)

EXPERIENCE

Analytics & AI Portfolio Developer (2024 - Present)

Independent - Daniel AI Suite

- Owned end-to-end product development for seven interconnected Streamlit applications - identifying problems, prioritizing features, defining requirements and acceptance criteria, designing workflows, and iterating from observed behavior
- Built quantitative recommendation and decision-support systems (Decision Score drafts, portfolio health scoring, Monte Carlo / efficient frontier, simulation labs) with Supabase-backed persistence, multi-user flows, and cross-app resume/insight orchestration
- Directed AI-assisted implementation while personally owning architecture, validation, root-cause debugging, regression checks, and deployment; authored SQL & Excel workbooks with KPI dashboards and 42+ structured queries including AI evaluator practice datasets

Full-Time High School Mathematics Teacher (2024 - Present)

The Montfort Academy

- Instruct Algebra II, Geometry, and Pre-Calculus with emphasis on quantitative reasoning, functions, and data interpretation
- Support Chemistry and Physics laboratory sessions requiring measurement, precision, and analytical documentation
- Apply structured problem-solving frameworks that parallel analytics debugging and hypothesis-driven analysis

Permanent Full-Time Substitute Teacher (2021 - 2024)

Yeshiva Har Torah

- Delivered K-8 secular and Judaic studies instruction across multiple subjects and grade levels
- Prepared science laboratory materials and supported hands-on quantitative observation activities
- Maintained classroom data tracking for student progress and instructional adjustment

Mathematics Instructor (2020)

Pace University

- Taught Mathematics for Life, College Algebra, and Calculus I - connecting algebraic reasoning to applied decision contexts
- Emphasized interpretation of quantitative results, not just procedural computation

Mathematics Instructor (2020)

Yeshiva University

- Led Calculus III Problem Solving Seminar focused on multi-step analytical reasoning and proof-style logic

Full-Time Lecturer / Adjunct Lecturer (2014 - 2019)

Kingsborough Community College (CUNY)

- Taught Quantitative Reasoning, College Algebra, Intermediate Algebra, Principles of Mathematics, and Pre-Algebra
- Developed curriculum reinforcing probability intuition, algebraic modeling, and statistical literacy at scale
- Supported diverse learners in translating word problems into structured quantitative frameworks

Adjunct Lecturer (2015 - 2019)

Queens College (CUNY)

- Instructed Probability & Statistics, Pre-Calculus, Calculus, College Algebra, and Math for Elementary School Teachers
- Taught hypothesis-testing concepts, probability distributions, and regression intuition at undergraduate level

Business Statistics Lab Professor (2012)

Queens College

- Led Business Statistics labs with Excel instruction, computer-lab analytics exercises, and data interpretation assignments
- Connected descriptive statistics, inference, and spreadsheet modeling to business decision scenarios

College Assistant & Academic Tutor (2011 - 2014)

Queens College

- Tutored Statistics, Economics, and Finance with focus on quantitative support and exam preparation
- Diagnosed knowledge gaps and built targeted practice for data interpretation and financial quantitative reasoning

Mathematics & Statistics Tutor (2011 - Present (periodic))

Tutor Doctor | Club Z | Private | SAT Prep

- Provided individualized instruction in Mathematics, Economics, Statistics, and Finance from remedial through advanced undergraduate levels
- Delivered SAT mathematics preparation emphasizing problem decomposition and analytical speed

SELECTED PROJECTS

Baseball Analytics | Python | Streamlit | scikit-learn

- Built full-season fantasy platform with Decision Score drafts, live draft rooms, shared leagues, and lineup/trade workflows
- Integrated research tools and AML insight handoff for analytical follow-up questions

Investment Explorer | Python | Streamlit | yfinance

- Shipped live portfolio health scoring, Monte Carlo, efficient frontier, and ETF overlap diagnostics
- Designed beginner/advanced modes on a shared analytics core; deployed on Streamlit Cloud

Applied Mathematical Intelligence | Python | Streamlit

- Built modular decision labs for EV, prediction, disease modeling, and AI training interpretation
- Routed analytical questions across the suite via Command Center insight handoffs

SQL & Excel Analytics Workbooks | Excel | SQL | pandas

- Created AI evaluator, investment, quant, and credit-risk workbooks with KPI dashboards and SQL practice
- Demonstrates fluency across Python products and spreadsheet-based business reporting

TECHNICAL SKILLS

Statistics | Probability | Hypothesis Testing | Experimentation | Simulation | Optimization | Python | SQL | Excel | Pivot Tables | Pandas | Streamlit | Data Visualization | Monte Carlo Simulation | Portfolio Optimization | Financial Analysis | Machine Learning | AI Evaluation | Product Requirements | Product Analytics | Workflow Design | Git / GitHub | Supabase | Debugging | Testing | Deployment | AI-Assisted Development | Decision Support Systems

TARGET ROLES

Fully remote U.S. | Grouped by related role families

Quantitative & analytics

Data Analyst | Quantitative Analyst | Financial Analyst | Business Intelligence Analyst | Research Analyst

Product & AI product analytics

Product Analyst | AI Product Analyst

AI evaluation & model evaluation

Model Evaluation Analyst | AI Evaluator

Associate product & technical product

Associate Product Manager | Associate AI Product Manager | Technical Product Manager | AI Product Manager

AI-assisted product engineering

AI Product Engineer | Product Engineer
