

DANIEL COHEN

Quantitative Analysis • Software Projects • Excel • Python & SQL

Queens, New York | daniel.cohen11@yahoo.com | [linkedin.com/in/daniel-cohen-355319340](https://www.linkedin.com/in/daniel-cohen-355319340) | github.com/Coakley11
Portfolio: coakley11.github.io/master-portfolio-hub

PROFESSIONAL SUMMARY

Quantitative professional with an M.A. in Statistics & Applied Mathematics (GPA 3.93), an MBA in Finance & Investments (Finance GPA 4.00), and Society of Actuaries Exams P, FM, and MFE. More than a decade of paid work teaching college and K–12 mathematics and statistics, with hands-on responsibility for electronic records, grading and scoring, accuracy review, written feedback, Excel, and remote instruction, plus earlier bookkeeping and bank-reconciliation work. Separately builds independent technical projects in Python, SQL, and Excel — applications and workbooks involving statistical modeling, simulation, data validation, and AI-output evaluation practice. Open to remote part-time, contract, and project-based analytical work.

EDUCATION & CREDENTIALS

M.A., Statistics & Applied Mathematics — Hunter College GPA 3.93
MBA, Finance & Investments — Baruch College, Zicklin School of Business Overall GPA 3.88 · Finance GPA 4.00
B.A., Mathematics & Economics — Queens College, CUNY Honors College Magna Cum Laude
Arthur D. Gayer Memorial Award in Economics (Queens College) • Society of Actuaries: Exams P (Probability), FM (Financial Mathematics), MFE (Models for Financial Economics) • NYS Certification: CST Mathematics (004), Educating All Students (EAS)

SKILLS

Used in paid work	Excel (formulas, sorting, charts, PivotTables, grade and bookkeeping records); grading and scoring against answer keys and criteria; electronic records; reports and written feedback; Word, Google Docs, Zoom, Google Meet; professional email.
Quantitative knowledge	Probability, statistical inference, regression, and financial mathematics, from graduate coursework, SOA Exams P/FM/MFE, and college-level teaching.
Project-based skills	Python (Pandas, NumPy, scikit-learn), SQL, Streamlit, Plotly, APIs, Git/GitHub, Supabase; Monte Carlo simulation and portfolio optimization; automated and regression testing; AI-assisted development; AI-output evaluation practice.

PROFESSIONAL EXPERIENCE

Independent Tutoring Business <i>Self-employed</i>	Current
• One-on-one instruction, adapting explanations to each student's questions and needs.	
Full-Time High School Mathematics Teacher <i>The Montfort Academy, Mount Vernon, NY</i>	2024 — 2026
• Taught Algebra II, Geometry, and Pre-Calculus; supported Chemistry and Physics laboratory sessions.	
• Maintained electronic student records (grades, attendance, rosters, assignment completion) and corrected recorded information when needed.	
• Created, administered, graded, and recorded exams, homework, quizzes, and written responses; reviewed work for mathematical accuracy, reasoning, and completeness.	
• Tracked performance across marking periods, prepared progress information, and communicated professionally with parents.	
Permanent Full-Time Substitute Teacher <i>Yeshiva Har Torah, Queens, NY</i>	2021 — 2024
• Followed detailed teacher plans and school procedures across changing K–8 classrooms, subjects, and schedules.	
• Often received unfamiliar assignments on short notice and independently determined how to deliver the lesson and maintain continuity; maintained and reviewed student work and classroom records.	

College Mathematics & Statistics Instructor

2012 — 2020

Kingsborough CC · Queens College · Pace University · Yeshiva University

- Kingsborough Community College (CUNY), 2014–2019: Quantitative Reasoning and algebra courses. Queens College (CUNY): Business Statistics lab, 2012; Adjunct Lecturer in Probability & Statistics and Calculus, 2015–2019. Pace University and Yeshiva University, 2020: complete college courses taught remotely by Zoom.
- Independently prepared syllabi and materials, graded exams, homework, and multi-step quantitative solutions, identified where reasoning or calculations went wrong, and assigned partial credit.
- Used answer keys and established scoring procedures (including Scantron-based assessment at Kingsborough); entered and maintained results in electronic grading systems and spreadsheets and met grading and reporting deadlines.
- Used Excel and computer-lab instruction for formulas, sorting, charts, descriptive and inferential statistics, and financial applications; communicated with students by email about exams, assignments, and deadlines.

College Assistant, Academic Tutor & Private Tutor

2011 — 2024

Queens College (2011–2014); tutoring organizations and private clients

- Reviewed student work in mathematics, statistics, economics, finance, and SAT preparation; identified errors and gave targeted explanations and written feedback.

Bookkeeping / Accounting Support

c. 2009 — 2010

Village Copier, New York, NY

- Performed bookkeeping-related spreadsheet work and bank reconciliation, comparing printed and online bank records with electronic records and investigating discrepancies.
- Entered financial information, used Excel calculations (sums, averages), and corrected entries when amounts or records did not match; cross-checked source documents to find data-entry errors and duplicate items.

Accounting / Financial Work

c. 2007

CureMD

- Accounting and financial work, including Excel charts related to profit-and-loss information.

INDEPENDENT TECHNICAL PROJECTS — DANIEL AI SUITE

Independent technical projects involving quantitative analysis, software development, and AI-assisted applications (2024–Present): seven deployed Python/Streamlit applications plus SQL and Excel workbooks.

AI Music Practice Coach *Python, Streamlit, OpenAI API, Supabase*

A nine-page practice studio — song catalog, section-focused practice, generated backing tracks, composition tools, multitrack layering, recording analysis, and practice log — sharing one active-song state, with autosave, optional cross-device restore, and a large automated test suite.

Baseball Analytics *Python, Streamlit, scikit-learn, Supabase*

A multi-user fantasy baseball system: Decision Score draft recommendations, live draft rooms, uploaded-draft import validation, shared leagues, and lineup and trade tools.

Investment Explorer *Python, Streamlit, yfinance*

Portfolio analysis with a health score, Monte Carlo simulation, efficient-frontier optimization, and ETF overlap analysis, presented for both beginner and advanced users.

Applied Mathematical Intelligence (AMI) and Command Center *Python, Streamlit, Supabase*

Modular labs for problem solving, game prediction, expected value, disease modeling, and AI-training visualization, with a shared hub that routes users and results across the suite.

SQL & Excel workbooks *Excel, SQL*

Practice workbooks with PivotTables, KPI dashboards, and structured SQL queries across finance, insurance, credit risk, and sports data, including an AI-evaluation practice workbook (150-row dataset, prompt rating, pairwise comparison) — independent practice, not paid evaluation work.

Other projects *Python, Streamlit*

NBA Playoff Companion (live games, bracket, matchup analysis) and Future Lens (prototype AI-transition scenario simulator).
